

Monday 24<sup>th</sup> August 2009

**AUSTRALIAN SECURITIES EXCHANGE  
COMPANY ANNOUNCEMENTS PLATFORM  
ASX CODE USA**

## Clarification

UraniumSA has identified data entry and typographic errors in its release of Thursday 20<sup>th</sup> August 2009 and provides the following corrected and additional information.

1. The note 1 at the foot of the map on page 7 should refer to “a grade in the range of” ( not “a bulk grade in the range of”).
2. Transcription errors are present

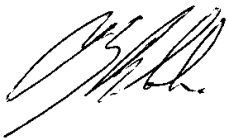

On page 8;

- a. MRM088 intersected an average grade of 0.016 %eU<sub>3</sub>O<sub>8</sub> (not 0.155 as shown).
- b. MRM101 had a peak grade of 0.129 %eU<sub>3</sub>O<sub>8</sub> (not 0.232 as shown which was from hole MRM098).

In the Highlights box on page 1, the second intercept was from hole MRM101 (not MRM100).

The Company regrets that these errors were not corrected in pre-release proofing, but considers that their inclusion in the original release did not materially impact the conclusions which were presented.

UraniumSA appreciates the constructive comment and input it has received from peer organisations in the uranium exploration industry.

Russel Bluck  
Managing Director  
UraniumSA Limited

*The exploration results and mineral resources reported herein are based on work and information compiled by Russel Bluck, a Member of the Australian Institute of Geoscience and employee of UraniumSA Limited with sufficient experience relevant to the style of mineralisation and type of deposits being considered and to the activity which he is undertaking to qualify as a Competent Person as defined by the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code, 2004 Edition) and have consented in writing to the material in this report.*
